

Big Opportunities Now Come in Small Systems

Silent Knight is pleased to introduce the IFP-25, a 25 point, single loop, addressable fire alarm control panel. The IFP-25 is part of the Farenhyt Series and provides an installation as easy as a conventional fire alarm, but with the intelligence of an addressable fire alarm. All at a conventional system price. So the IFP-25 is the perfect control panel for those small jobs like sprinkler monitoring, or school campuses and smaller size buildings that require fire protection. The IFP-25 provides the value and performance of addressable technology combined with a built-in digital dual-line communicator and easy to use interface.

- *Cost effective*
- *Easy to Install*
- *Perfect for Smaller Installations*
- *Addressable*
- *Features its own Honeywell Fire Systems (HFS) Detectors and Modules*

Features

- **Addressable technology at a conventional price** – Using standard wire, no shielded or twisted pair required, the new cost-effective HFS detectors give you the powerful features and benefits of addressable technology in a conventionally priced package. Drift compensation greatly reduces nuisance alarms, maintenance alert reduces repeat service calls for particulate affected detectors, and point status eliminates calibrated smoke test requirements for NFPA 72.
- **No custom programming tools required** – With code wheel addressable detectors/modules and JumpStart™ feature the panel can be operational without a single programming tool. Custom programming, such as dialer options, are programmed through the panel's innovative built-in browser. No custom downloading software or updates required!
- **Silent Knight simplicity** – Simple installation, simple programming, and simple user interface all combine for a quick installation and reliable fire protection that Silent Knight is known for.

Honeywell Fire Systems (HFS) Detectors and Modules:

Model #	Description
HFS-P	Addressable photoelectric smoke detector
HFS-PT	Addressable photoelectric smoke detector with thermal
HFS-D	Addressable photoelectric duct smoke detector
HFS-T	Addressable fixed temperature thermal detector
HFS-MM	Addressable mini monitor module
HFS-MR	Addressable relay module
SK-Pull-DA	Addressable dual action pull station
SK-Pull-SA	Addressable single action pull station

Call 800-328-0103 to order today, or visit www.farenhyt.com for more information.

Thank you for your continued business and support of Silent Knight.

For more information contact your local Farenhyt Distributor or call 800-328-0103 or visit www.farenhyt.com.
