

Budget Suites

Silent Knight IFP 1000 Addressable Fire Control Panel Chosen for Budget Suites of America in Texas

Silent Knight has brought its world-class fire detection and alarm systems to Budget Suites of America® in San Antonio, Texas. An IFP 1000 Addressable Fire Control Panel and 8 RPS 1000 power supplies were installed at the 360 room, 8-building facility.

According to Brad Koons, president of Medina Valley Security, Inc. (MVS) of Natalia, Texas, "As a Silent Knight dealer, I knew I could provide the highest level of fire protection at a competitive bid." Koons won the job with Silent Knight's IFP 1000 and RPS 1000. He explained that because each of the 8 buildings has its own RPS power supply, a minimum of wiring was required throughout the facility which kept installation, manpower and material costs down. He added, "Wiring and programming for the IFP 1000 is simple. It was a trouble-free job."

The IFP 1000 from Silent Knight is ideal for a variety of jobs including small-to-mid size universities, office buildings, manufacturing facilities, shopping centers and other institutions.
