SILENT KNIGHT PROVIDES FIRE PROTECTION SOLUTION FOR LEADING POWER MANAGEMENT COMPANY

*IFP-2000 Fire Alarm Control Panel meets building's requirements for
reliable, state-of-the-art solution*

NORTHFORD, Conn. – Silent Knight recently worked with Eaton Corporation to address the fire protection needs at one of their locations. Eaton, a global power management company with a campus located in Eden Prairie, Minnesota contacted UHL Company, an engineered systems distributor and integrator to provide a reliable, state-of-the-art solution. UHL specified the new IFP-2000 Scalable Intelligent Analog-Addressable Fire Alarm Control Panel (FACP) from Silent Knight to meet the fire safety needs on Eaton's campus.

To begin the specification process, Silent Knight invited their neighbors at Eaton to tour their manufacturing facilities and see first hand the best solutions available for the project. After viewing demonstrations and speaking with the Silent Knight employees' who designed and built the panels, Eaton decided on the new IFP-2000. The high quality, cost effective panel from Silent Knight would allow Eaton to achieve their goal of complete facility automation.

The replacement of the existing fire alarm system at Eaton has recently been completed with the installation of Silent Knight's IFP-2000 panels. Equipped with

addressable architecture such as individual point identification, drift compensation and maintenance alert, the IFP-2000 is a welcome addition to the UL Listed Eaton campus.

“We believe the ability to monitor our entire fire protection system in real time allows us to run at peak efficiency,” said Lawrence Harer, maintenance manager for Eaton’s Hydraulics Business. “Silent Knight allows us to monitor all aspects of the fire panel at any time so we can see impending failures before they happen. Throughout all phases of the project, Silent Knight has provided us with unparalleled customer service and support.”

The IFP-2000 is 9th Edition UL Listed and FM Approved, and is the most advanced solution ever offered by Silent Knight. The system has the interconnection capability for up to eight panels, and the networked system can either be configured to emulate one large virtual system or segmented into separate sites for multiple building applications.

Eaton’s Hydraulics Business is a segment of the Eaton Fluid Power Group. The business is a worldwide leader in the design, manufacture and marketing of a comprehensive line of reliable, high-efficiency hydraulic systems and components for use in mobile and industrial applications. Mobile and industrial markets include agriculture, construction, mining, forestry, utility, material handling, earthmoving, truck and bus, machine tools, molding, primary metals, automotive, power generation, port machinery and entertainment. Eaton’s Hydraulics Business provides customer-driven solutions under product names such as Aeroquip[®], Boston[®], Char-Lynn[®], Eaton[®], Hydro-Line[®], Synflex[®], Vickers[®], Walterscheid[™], and Weatherhead[®]. For more information, visit www.eaton.com/hydraulics.

Silent Knight is part of the Honeywell (NYSE: HON) Life Safety Group, an industry leader in providing commercial fire alarms, advanced detection and notification products, and home patient remote tracking.

Honeywell International is a \$37 billion diversified technology and manufacturing leader, serving customers worldwide with aerospace products and services; control technologies for buildings, homes and industry; automotive products; turbochargers; and specialty materials. Based in Morris Township, N.J., Honeywell’s shares are traded on the New York, London and Chicago Stock Exchanges. For additional information, please visit www.honeywell.com.
